- Implemented and maintained our library of forms using MySQL

SKILLS

Technologies: SQL, Java, JavaScript, React.js, Node.js, HTML/CSS

PROJECTS

Quisp

A web application to help bar and restaurant owners handle their sign-in and employee data. The core technologies used for this application are MongoDB, Express, React, and Node.js. I also included libraries like Stripe.js for payment processing and Redux for state management. I am currently in talks with bar and restaurant owners around the Fox Cities to determine use cases.
